

# Iteration 1 Sprint Retrospective

Team:

- Need to assign a QA/testing role to a member

UI mockup

- Do proper one so accepted datasets must be identified

Trello / User stories / product backlog:

- Need to break down large user stories into tasks
- Need to document who does each task splits
- Transfer all user stories to trello product backlog
- Have user stories as titles of the cards with tasks nested
- Add user story for web app

Time Tracking :

- More detailed and precise description of what you did
- Same name for tasks on toggl and trello

Gitlab :

- Create branches based on each team member (instead of functionalities)
- Meaningful comments on git commit (to make sure others understand easily)
